

```
└─ TLSv1.2 Record Layer: Application Data Protocol: HyperText Transfer Protocol 2
    └─ Content Type: Application Data (23)
    └─ Version: TLS 1.2 (0x0303)
    └─ Length: 33
    └─ Encrypted Application Data: 000000000000002e521719ac5375772edc55424e07611dc3d2b9159f7aec2dfb1
        [Application Data Protocol: HyperText Transfer Protocol 2]
```

Here, we can see the **Encrypted Application Data** by filtering the packages (`ip.dst == 216.58.206.234`, to see packages that goes to the remote server), and choosing the *Application Data* field.
